DIY MODULAR TANKS

Why choose a Modular Tank

The Modular Tank is proudly Australian designed and owned and is a unique, sturdy and modern designed tank that is well suited to the Australian environment and home.

They are manufactured in a flat pack design so they are easy to transport and assemble on site.

Detailed instructions on hard back or DVD are provided so a typical handyman can easily position and assemble a modular tank.

Tanks are available in a wide range of colours and stocks are available now for delivery within 10 to 15 working days. Customised sizes and confined space entry are our specialty.

Tanks are non-combustible so they can be positioned against your fence or house.

Manufactured with a Ten Year warranty and meeting the highest standards of drinking water. Made from Australian galvanised steel, colour bond panels and a durable AS 4020 Portable Tank Liner.

All tanks are supplied with a fine 300mm mesh inlet strainer, a 90mm overflow, 25mm tank outlet and all other accessories required to assemble your tank.

Sizes are available from 1,000 litres to 10,000 litres in a variety of widths and heights.

For more information or to order please contact Paul on 0405 138 664.
